SEE THE DIFFERENCE

Not all metal structures are the same.

Why Choose Ironclad Carports & Metal Bldgs. for Your Carport and Metal Building Needs?

In today's market, there are many companies offering metal buildings, but not all are created equal. At **Ironclad Carports & Metal Buildings**, we take pride in providing more than just a metal structure; we deliver peace of mind with every structure we create.

Our Commitment to Quality

While some companies cut costs by bidding out each project and hiring the cheapest crews, we've taken a different approach. We only use the highest quality materials and employ skilled, trained professionals who are part of our own dedicated team. From the start of the project to its completion, you'll know exactly who is handling your building—because we're with you every step of the way. We carefully select our materials and work exclusively with the most trusted manufacturers to ensure your building stands the test of time. Whether you need a garage, barn, warehouse, or custom structure, you can rest assured that we will provide you with a product built to last.

Integrity You Can Trust

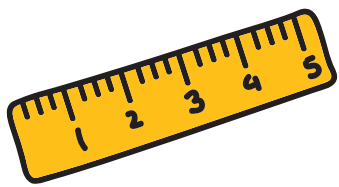

At **Ironclad Carports & Metal Buildings**, we don't just build carports & metal buildings—we build lasting relationships. We believe that great customer service doesn't stop when the project is completed. If there's ever a problem, you can count on us to stand behind our work and take care of you. It's why we've been trusted by customers for many years.

Choose Ironclad Carports & Metal Buildings: Where Quality Meets Integrity

When you choose **Ironclad Carports & Metal Buildings**, you're not just choosing a metal building—you're choosing a partner that values your time, investment, and trust. Our team is ready to bring your vision to life with unparalleled craftsmanship and care.

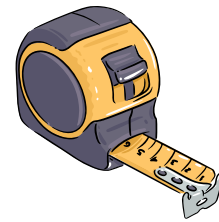

Experience the Ironclad Carports & Metal Buildings Difference Today!

Discover the company that has been trusted for years to deliver the best in metal building solutions. Call us today to start your project and see why **Ironclad Carports & Metal Buildings** is the name people rely on for quality, integrity, and exceptional service.

Size Guide

See What Fits

3

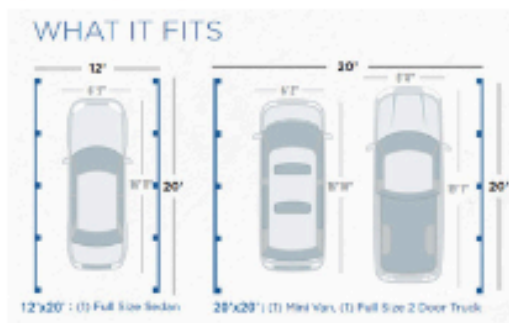

What is the right size for my cover?

Consider the space between the vehicles. There should be enough space between the vehicles such that the doors to each car can be opened freely without hitting or touching the other vehicle. We recommend that you measure the width of each vehicle to be covered and add 4' - 5' for each vehicle.

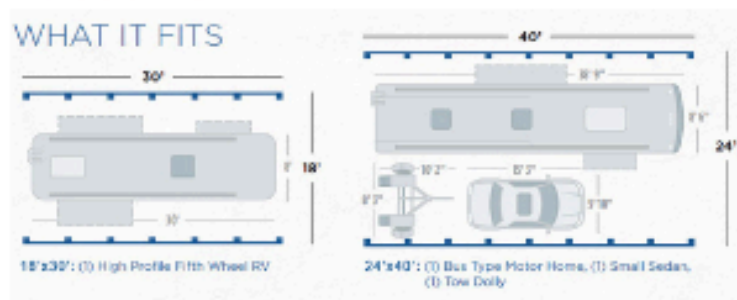

Suggestion:

- 12' Wide: 1 Car, Truck or SUV
- 18' Wide: 2 Compact cars
- 20' Wide: 2 Mid size cars, Trucks or SUVs
- 22' Wide: 2 Full Size cars, Trucks or SUVs
- 24' Wide: 2 Full or oversized vehicles
- 26' Wide: 3 Mid size cars
- 28' Wide: 3 Mid size cars
- 30' Wide: 3 Mid size cars, Trucks or SUVs

- 14- Gauge Galvanized Steel Framing
- 29- Gauge Metal Roofing
- Generic Drawings for certification at 140 mph & 35 psf
- Concrete Anchors Included
- 90 Day Workmanship Warranty
- Delivery & Installation Included
- 10 Year Limited Rust Through Warranty
- Lift Required for Legs 15' or Taller & or 32' Wide or Wider
- 17 Colors Available

Loafing Sheds:

5

The Perfect Shelter for Your Horses

When it comes to providing top-notch care for your horses, The Loafing Shed stands out as the perfect solution. Engineered to withstand harsh weather conditions, this sturdy shed promises years of dependable service. With its spacious design and abundance of natural light, it ensures your horses remain comfortable and well-protected, no matter the weather.

Designed with your horses' well-being in mind, The Loafing Shed offers more than just shelter — it provides peace of mind, knowing your animals are safe and secure.

Whether you're running a large ranch or just need reliable protection, The Loafing Shed is a must-have for your property. Order yours today and give your horses the comfort and security they deserve!

6 RV Carports:

It is recommended for customers to close an end & have a 3' panel on at least one side to provide better structural stability due to height requirements for an RV Cover.

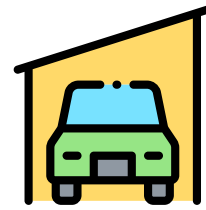

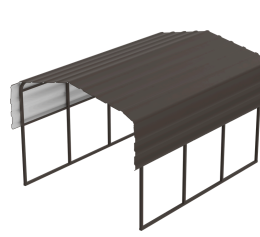

Suggested Heights:

- Bumper Pull RV'S - 12' Leg Height
- 5th Wheel RV'S - 14' Leg Height

Carports:

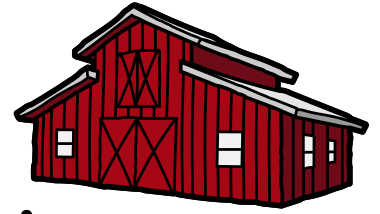

7

Standard Features:

- Starting at 6' Leg Height on all sizes
- Horizontal and Vertical Roof Styles Available
- Available in sizes 12' - 30' Wide
- Commercial Widths up to 40' Wide
- Available in lengths up to 35' long for Horizontal Roof's only (Vertical Roof's up to 100' long)
- Standard with concrete anchors (mobile home anchors for additional charge)
- Installation available on Ground, Gravel, Concrete, or Asphalt

8 Metal Buildings, Barns, & Garages:

*The possibilities are endless when it comes to
our Metal Buildings, Barns, Combos, Garages.*

Things to consider when purchasing a metal building, barn, or garage that affect pricing:

- What size and style you are in the market for.
- Do you want vertical or horizontal walls?
- Do you want wainscoting?
- Do you want the structure insulated?
- What size Roll up doors would you want?
- What size windows would you want?
- How many walk in doors would you want?

Double legs are recommended for buildings 11' - 14' in height.

Ladder legs are recommended for buildings 15' or taller in height.

*** We will need to know exact Roll Up Door placement when you place your order. The walk-in doors & windows can be decided at time of installation. ***

10 Metal Color Chart:

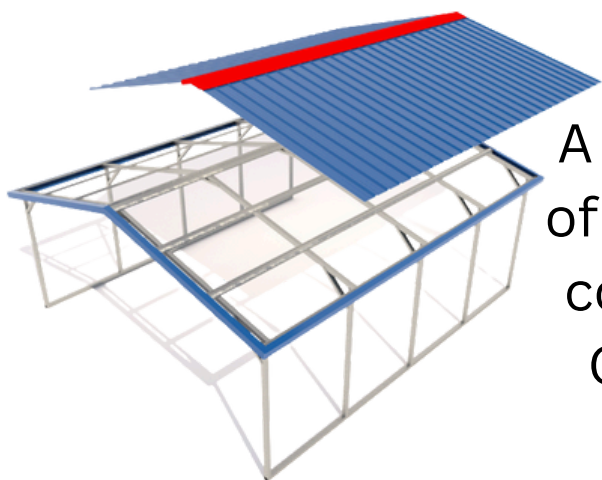

You Can Choose a Roof Color, Trim Color, Wall Color, & Wainscot Color. (Vertical wainscot is an additional charge)

Components:

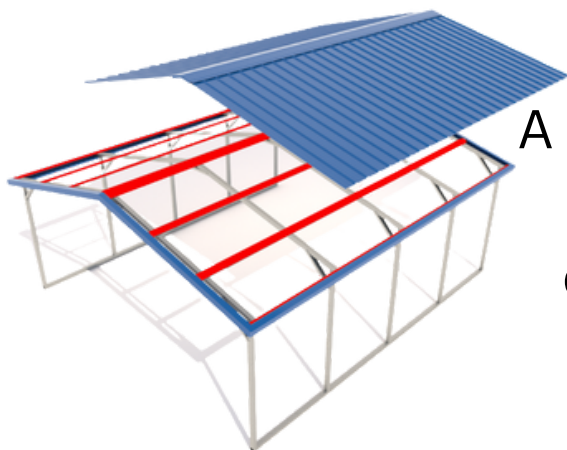

Ridge Cap:

A transition piece covering the ridge of the roof. The ridge cap is normally color matched with the roof panels. Customer can change color, but it must be specified.

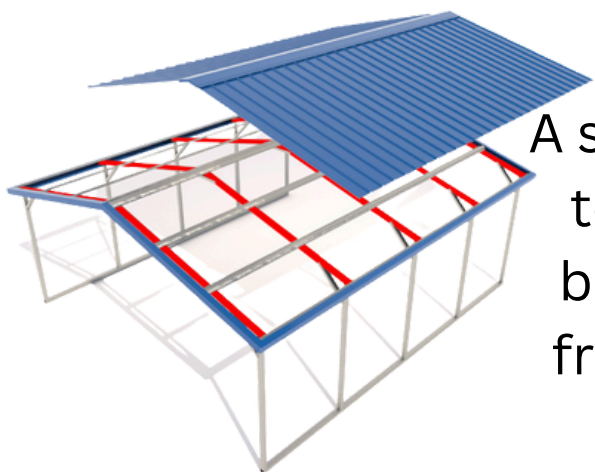

Hat Channels:

A galvanized steel component that is used to create a vertical roof orientation. The hat channel also provides more rigidity for a stronger structure

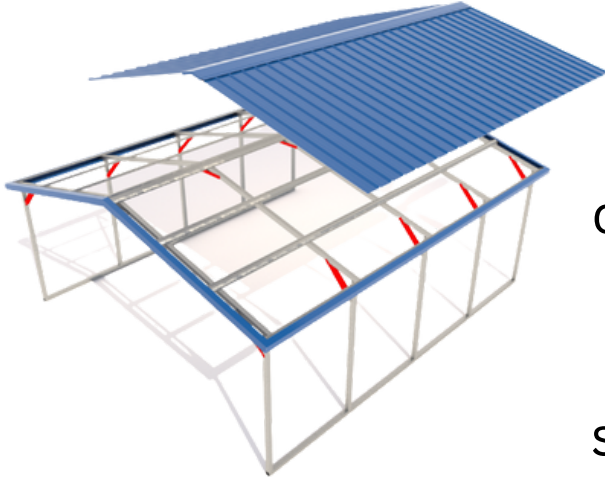

Bows:

A single piece of square tubing used to make the roofing member of a building. The tubing can be made from either 14 gauge or a 12 gauge steel

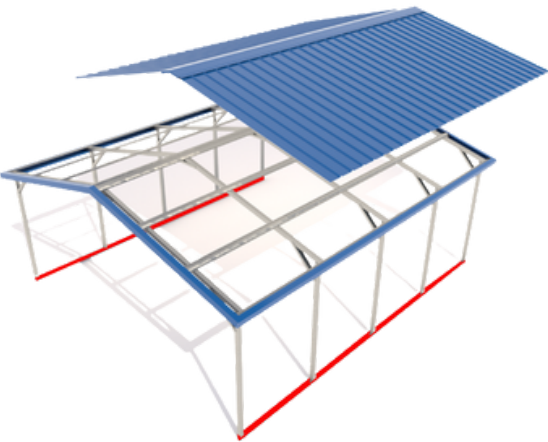

12

Components:

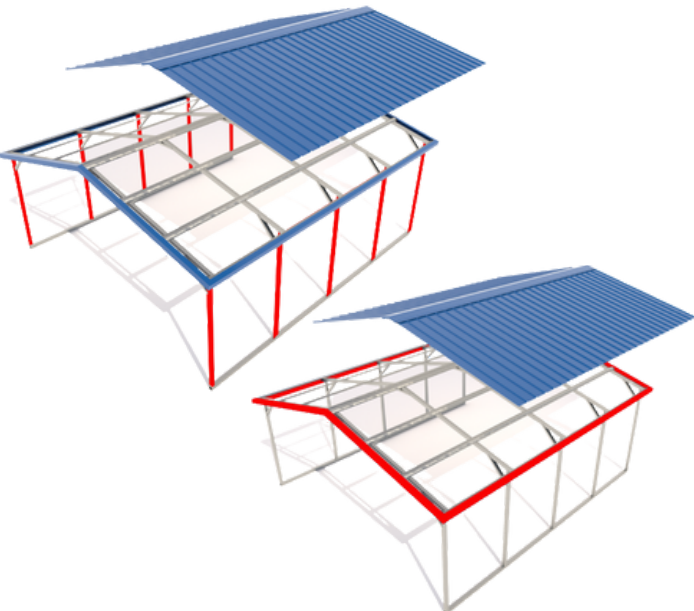

Braces:

Braces are U-shaped channels that are used to reinforce the structure of a building. For buildings in which the braces are optional we recommend 2' braces on buildings shorter than 8' tall and 3' braces for buildings 9' or taller.

Base Rails:

The square tubing on the base of the building onto which the legs are attached to.

Leg Post & Trim:

Legs are the vertical tubing that connect the bows (top) to the base rail (bottom). The leg height varies depending on the type of building.

Trim to give the roof and building corners a finished and a more aesthetic view.

Options & Upgrades:

13

Roll Up Doors (installed on closed walls only)

- Custom Framed Openings
- Extra Sheet Metal Panels (3' high)
- Gables on Ends
- Extended Gables (Gable & 3' sheet panel)
- Anchors (installed) Mobile Home Auger Anchors
- Wood Post for Lean To's on Buildings
- Colored Screws
- Cutting Legs on Site (if ground is not level)
- 12 Gauge Galvanized Steel Framing (2.25") (upgrade)
- 14 Gauge Galvanized Steel Framing (2.5")
- 26 Gauge Metal Sheeting (upgrade)
- Insulation R5 Reflective Double Bubble & R7 Vinyl 2"
- 9-Lite, Diamond Window, and Solid Walk in Doors
- 24x36, 30x30, & 30x36 Windows
- Automatic Rollers for Roll Up Doors.

Warranty:

- 10 Year limited Rust Through Warranty
- 90 Day Workmanship Warranty
- 20 Year Metal Sheeting, Paint Warranty from fading, bubbling, and chipping.

14 Materials & Anchors:

Our buildings are made with commercial grade square tubing in **14GA (2.5") and 12GA (2.25") steel.**

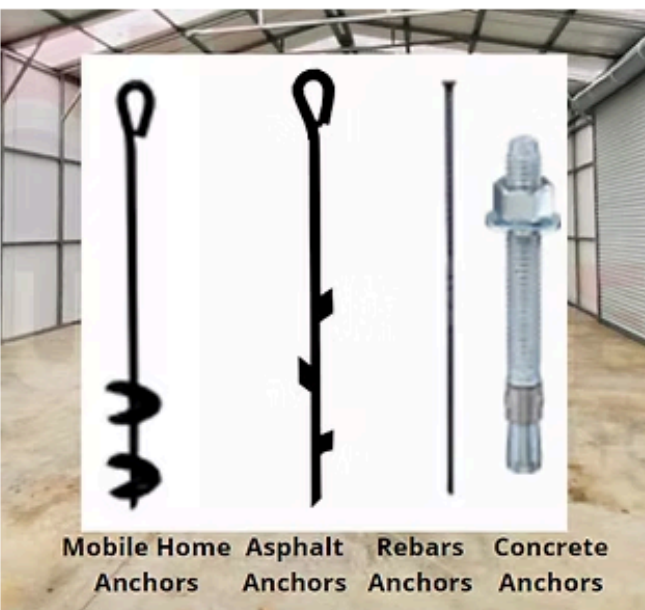

All tubing is galvanized during the manufacturing process to prevent surface rust.

SHERWIN-WILLIAMS.

We carry 26GA and 29GA Ridged sheet metal that is coated with Sherwin Williams Paints which provides all our customers with an exclusive 20yr Paint Warranty, protecting the product from fading, bubbling, and chipping.

Mobile Home Anchors Asphalt Anchors Rebars Anchors Concrete Anchors

Upgraded anchoring options such as:

✓ Mobile Home Anchors (add'l charge)

(MHA) are 30inch long corkscrew anchors that are specifically designed for ground, gravel, and grass foundation.

✓ Asphalt Anchors

Are 30inch long with a barbed shaft that are specifically designed for asphalt, solid limestone, and compacted rock foundation.

✓ Concrete Anchors

Are wedge-style bolts that are 6inch long and ½ inch in diameter with a 5/8 head. They are specifically designed for concrete foundation.

Installation & Concrete Details:

15

To ensure you receive the best installation possible, **PLEASE READ THIS PAGE.**

For a run to be successful, we count on you to ensure beforehand that your site is ready for installation. The following are the things to consider:

- Make sure your site is level or no more than 3" off level. If it is unlevel we need to know upfront so that we know if you need the legs cut on site.
- The install crew will be pulling a 30' to 36' trailer. Maneuvering into small or steep driveways may very well not be doable. Please advise us if you think that this is a concern.
- **If unit is to be installed on a concrete pad, please let us know as soon as the pad is ready. If it has not been poured yet, please let us know of a time frame you think the pad will be ready.**
 - **Option 1: A concrete pad the same size as the frame of the building. For Example, If you purchase a 20x30 unit, build a concrete pad that is 20' wide x 30' in length**
 - **Option 2: A concrete pad with a 1.5-inch ledge. For Example, if you purchase a 20x30 unit, build a concrete pad that is 20' wide and 30' in length and have your concrete contractor make an additional 1.5-inch ledge all the way around. This will make your slab 3 inches longer and 3 inches wider than the base. This will allow the metal to go down past the floor to prevent water from coming in at the bottom. In construction terms, this is what is called a "brick ledge." In total, with the ledge the slab would be 20'-3"x30'-3".**
- Inquire upfront if you need any special building permits. Some counties or towns have websites you can visit for all the paperwork needed (if any) before installation.

16 Financing & RTO Options:

We offer multiple Rent To Own and Financing

- **EZ Pay RTO**
 - A credit check will only be necessary for structures with an RTO amount over \$12,000.00.
 - A credit score of 600 or higher is needed to proceed if a credit check is required.
 - Max amount able to finance through RTO is \$20,000.00. Anything over that would have to be paid down.

<https://ezpaybuildings.net/DealerContractForm.aspx?d=2962>

- **HFS Financial**
 - Up to 120% financing so you are allowed to finance any concrete foundations, etc.
 - Terms up to 20 Years.

<https://www.hfsfinancial.net/promo/65a55fc69089f9172d54bd08/>

- **RTO National**
 - Offers RTO and Financing
 - RTO with no credit check
 - 24-60 month terms
 - Up to \$20,000.00 max amount financing

(RTO) <https://www.rtonational.com/apply/aaa4b42d-71b7-47fb-bca6-52454b3322bb>

(Finance) (680 score +) <https://www.rtonational.com/apply/a0c1ec94-213f-42d4-876e-1fee2fb7239f>
